The New Website!

The New WEBSITE!

We are pleased to announce the launch of our renovated website! After six months of hard work and dedication, the new website went online on June 14, 2020. You can reach the new homepage via our official address at www.wsi-oilfield.com.

The new design aims to enable our visitors to explore WSI services and solutions more easily and will let them browse information based on their desired choices. WSI website is interactive and provides enhanced access capability to all categories such as About Us, Solutions, Projects, R&D, News, Events, Careers, etc. In addition, our current and prospective clients can find up-to-date information regarding existing WSI services and recent developments on the homepage of the website.

The projects section will highlight WSI completed missions and outlines the value created for each client as a result. Amongst the new features, the website contains integrated social media function for LinkedIn to foster the improved communication with our clients and followers. We will constantly update WSI website with useful information, company announcements, news, challenges, projects and newsletters.

We hope you enjoy the new look of our website, and find the new features effective to reach the desired information conveniently.

How to Organize Your Desk!

Part 2: Reordering Your Desk

1. **Change up your desk's configuration.** Now that it's time to start putting things back on your desk, don't just stick everything back where it was. Think of new ways you could reorder your desk to take advantage of the space you have. You might simply "mirror" your desk by putting things back on the opposite side, or choose new locations for each piece individually. Devising an engaging layout that will help you stay interested while you're working.
2. **Stock up on new supplies.** Running low on paper, ink pens or staples? Visit an office supply store and pick up some materials to replenish your desk. Take a list with you so you won't forget the basics or use your phone for the list. Focus on things that you use a lot and tend to go through

- quickly. When it's time to get to work, you'll be stocked on all the essentials, that you need.
3. **Arrange items sensibly.** Once you have an idea of how you want your new desk layout to look, position your belongings in a way that will maximize productivity while eliminating potential clutter. Reserve the center of the desk for your computer, for instance, while keeping important tools and documents within arm's reach. Not only will this make it easier to work, it will also

keep you from having to search for things because they will always be in the most logical spot.

4. **Add some flair.** A clean, organized desk is the goal, but that doesn't mean it has to be dull. Add a few decorative touches to your desk to give it a little personality. A couple framed pictures, a small statue or a humorous coffee mug can liven up your space and make it feel more like home.

ISO 9001: 2015 Quality Management System:

As previously planned, the implementation of WSI Quality Management System according to ISO 9001:2015 has begun and is moving ahead on schedule and with a constructive momentum. WSI ISO team, including the function and segment managers and their proposed representatives, is established. All existing WSI business information (i.e., technical, procedural, laws and regulations etc.) have been collected from all segments. They will be reviewed for a gap analysis to identify the existing, and also missing processes that are required by a business and also by ISO 9001 standards. WSI ISO team is currently being trained for familiarization of ISO 9001 clauses and requirements to gain an overall insight of the entire standardization process.

In addition, the pre-defined PIA Quality Assurance (QA) process procedures are being performed, monitored, and controlled to ensure the sustainability and renewal of PIA ISO 9001 QMS certification that has been issued and approved by QS auditing company.

We are currently implementing "Risk Management Process" with the following objectives:

1. Provide a systematic approach to the early identification and management of business risks;
2. Provide consistent risk assessment criteria;
3. Make available accurate and concise risk information that informs decision making including business direction;
4. Adopt risk treatment strategies that are cost effective and efficient in reducing risk to an acceptable level;
5. Monitor and review risk levels to ensure that risk exposure remains within an acceptable level.

What's going on in WSI!

Condolences

With a very heavy heart, we inform about the sad demise of our colleague, Mr. Ramin Jafari. He sadly passed away on July 30, 2020, in his hometown. His dedication and honesty towards his job were impeccable. His death is indeed a big loss for all of us. May Allah bless his soul and may he rest in peace.

"No matter how brilliant your mind or strategy, if you're playing a solo game, you'll always lose out to a team."

Reid Hoffman, LinkedIn co-founder

We Are 3,000!

An expression of gratitude to you for following us! Much appreciation to you to such a great amount for following us on LinkedIn! Thanks for all your support.

Happy Birthday!

We would like to extend our congratulations and birthday wishes to the following colleagues for having birthdays in July and August. May this year be so much better than the last for you in every walk of life.

- Mohammadreza Siami (T)
- Soleiman Hatami (K)
- Yousof Shahrestani (K)

- Eslam Bahrami (K)
- Zhila Kazemi (T)
- Mostafa Nozarian (K)
- Afshin Astaneh (K)

Congratulations to WL Team!

- Congratulations to the WL team on being awarded the AZAR project. Best wishes in your future endeavors. We are confident that you will continue performing greatly.

- WSI congratulates the WL team on winning the Lali contract. We appreciate your efforts and hard work. NISOC is responsible for developing 8 wells in the Lali field. It is planned to drill 5 new wells and perform work-over on 3 wells in Lali field.

"When you have had a taste of excellence, you cannot go back to mediocrity."

Maximillian Degenez

Congratulations to Well Testing Team!

Congratulations to Well Testing team for receiving an appreciation letter from DCI management due to conducting an excellent operation and teamwork, also demonstrating a noticeable safety approach toward their assigned duties on DCI02 Jack up rig during well-testing clean-up on an injection well (SCI-F7) in Sirri-Civand field.

WCP Successful offshore Operation:

A successful conventional well testing operation along with oil measurement for DCI on well SCI-F06. The flawless operation rendered for DCI company though completion with ESP pump. The execution of operation appreciated by client by official appreciation letter to WCP team.

Operation Highlights:

- Twenty days Flawless flowing operation without NPT.
- Burning effluent without any environment issue.
- Cold flaring by WSI engineering design to production line in a format of short EPF by using Rig available pumps.
- Fast and effective rig up equipment as per designed layout.
- Data acquisition and delivery to client for all required measurement as per test program.
- Assisting rig crew for burner maintenance and execution.
- Client satisfaction in all step of operation including preparation, mobilization, operation, rig up, rig down and demobilization.

Well Services of Iran

Employee Care

Food and Nutrition Tips During Self-Quarantine

General Tips:

- Make a plan - take only what you need
- Be strategic about the use of ingredients - prioritize fresh products
- Prepare home-cooked meals

- Take advantage of food delivery options
- Be aware of portion sizes
- Follow safe food handling practices
- Limit your salt intake
- Limit your sugar intake
- Limit your fat intake
- Consume enough fibre
- Stay hydrated
- Enjoy family meals

Best Food Buys:

- Long-lasting fresh fruits and vegetables
- Frozen fruits and vegetables
- Dried and canned pulses
- Whole grains and starchy roots
- Dried fruits, nuts and seeds
- Eggs
- Canned vegetables
- Canned fish
- Reduced-fat, shelf-stable milk

Congratulations

Dear Mohammad Taheri (K),
Congratulations on your daughter's birth, Farahzad.

Dear Jalil Samiey (K),
Congratulations on your son's birth, Alireza.

Dear Hossein Mirzaei (K),
Congratulations on your son's birth, Vala.

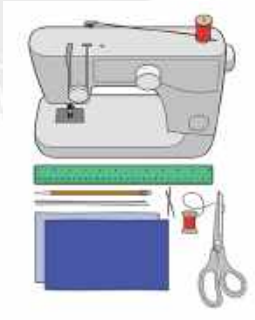

How to Make Cloth Face Coverings

Iran health ministry mandated and CDC recommends that you wear cloth face coverings in public settings when around people who don't live in your household, especially when other social distancing measures are difficult to maintain. Cloth face coverings are most likely to reduce the spread of COVID-19 when they are widely used by people in public settings.

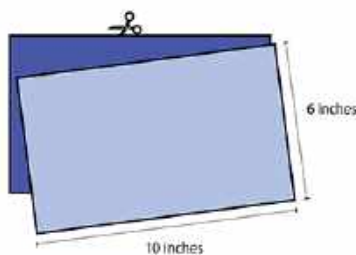

Simple cloth face coverings can be made at home and may help prevent the spread of COVID-19.

Materials

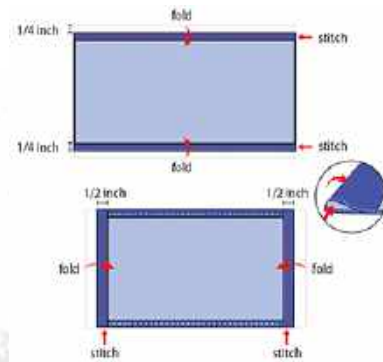

- Two 10"x6" rectangles of cotton fabric
- Two 6" pieces of elastic (or rubber bands, string, cloth strips, or hair ties)
- Needle and thread (or bobby pin)
- Scissors
- Sewing machine

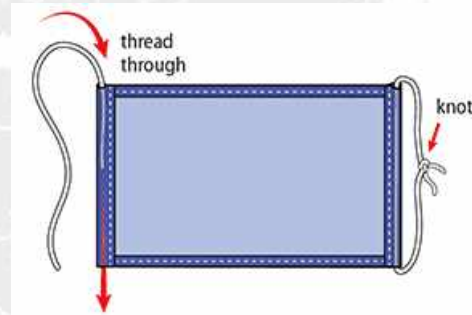

Step 1. Cut out two 10-by-6-inch rectangles of cotton fabric. Use tightly woven cotton, such as quilting fabric or cotton sheets. T-shirt fabric will work in a pinch. Stack the two rectangles; you will sew the mask as if it was a single piece of fabric.

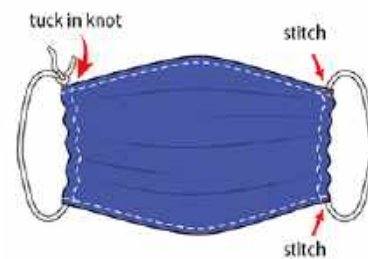

Step 2. Fold over the long sides $\frac{1}{4}$ inch and hem. Then fold the double layer of fabric over $\frac{1}{2}$ inch along the short sides and stitch down.

Step 3. Run a 6-inch length of 1/8-inch wide elastic through the wider hem on each side of the mask. These will be the ear loops. Use a large needle or a bobby pin to thread it through. Tie the ends tight.

Step 4. Gently pull on the elastic so that the knots are tucked inside the hem. Gather the sides of the mask on the elastic and adjust so the mask fits your face. Then securely stitch the elastic in place to keep it from slipping.

How to protect your mental health during the coronavirus pandemic?

(Part 1)

The coronavirus disease 2019 (COVID-19) pandemic may be stressful for people. Fear and anxiety about a new disease and what could happen can be overwhelming and cause strong emotions in adults and children. Public health actions, such as social

distancing, can make people feel isolated and lonely and can increase stress and anxiety. However, these actions are necessary to reduce the spread of COVID-19. Coping with stress in a healthy way will make you, the people you care about, and your community stronger

Take care of your mental health

- ✓ Recognize that your anxiety is completely normal. If school closures and worrying headlines are making you anxious, you are

not the only one. Actually, that is how you should be feeling.

- ✓ Find a distraction. When people are in chronically difficult conditions it's helpful to divide the problem into two categories: things they can do something about, and then things they can do nothing about. There's going to be in that second category right now, and that's fine, but what can help us cope are distractions. Psychologists suggest doing homework, watching favorite movies, reading books, as ways to make finding a balance in life.

Dear colleagues

WSI is eager to give employees a chance to offer their feedback and sentiment on the newsletter contents and organizational changes to promote culture of feedback. To enrich our newsletter, we will appreciate it if you send us your news as well as views:

IT Success Story

Windows Server Update Services (WSUS) enables information technology administrators to deploy the latest Microsoft product updates. You can use WSUS to fully manage the distribution of updates that are released through Microsoft Update to computers on your network.

WSUS Server Role Description

A WSUS server provides features that you can use to manage and distribute updates through a management console. A WSUS server can also be the update source for other WSUS servers within the organization. The WSUS server that acts as an update source is called an upstream server. In a WSUS implementation, at least one WSUS server on your network must be able to connect to Microsoft Update to get available update information.

Definition - What does Windows Server Update Services (WSUS) mean?

Windows Server Update Services (WSUS) is a free add-on application offered by Microsoft that can download and manage updates and patches for Windows Server operating systems.

Techopedia Explains Windows Server Update Services (WSUS)

WSUS is a software application provided by Microsoft to enable administrators to manage the

distribution of updates and patches for the Microsoft software products to the computers in their network. WSUS analyses the current system and determines the required updates and helps users to manage the downloads in a corporate environment.

It is particularly useful for SMBs as it acts an intermediate between the simpler Windows Update used in individual PCs and the more robust Systems Management Server used in larger enterprises.

Some of the features provided by WSUS are:

- Bandwidth management and network resource optimization
- Automatic download of updates and category-wise downloads
- Targeted download of updates to specific computer or sets of computers
- Enhanced reporting capabilities
- Multiple language support

The group policy of WSUS allows admins to direct the workstations connected in their network to the WSUS server and restrict the end users' access to Windows Update, thus giving the administrators full control over the network. The automatic downloads are enabled with the help of BITS and helps in optimizing the bandwidth usage.

Results:

Windows Server Update Services (WSUS) has been implemented. A WSUS server provides features that you can use to manage and distribute updates through a management console.

The core scenarios where WSUS adds value to our business are:

- Centralized update management
- Update management automation

Cloud computing with AWS

Amazon Web Services (AWS) is the world's most comprehensive and broadly adopted cloud platform, has significantly more services, and more features within those services, than any other cloud provider –from infrastructure technologies like compute, storage, and databases– to emerging technologies, such as machine learning and artificial intelligence, data lakes and analytics, and

Internet of Things. This makes it faster, easier, and more cost effective to move your existing applications to the cloud and build nearly anything you can imagine. AWS also has the deepest functionality within those services. For example, AWS offers the widest variety of databases that are purpose-built for different types of applications so you can choose the right tool for the job to get the best cost and performance. AWS is architected to be the most flexible and secure cloud computing environment available

today. Our core infrastructure is built to satisfy the security requirements for the military, global banks, and other high-sensitivity organizations. This is backed by a deep set of cloud security tools, with 230 security, compliance, and governance services and features. AWS supports 90 security standards and compliance certifications, and all 117 AWS services that store customer data offer the ability to encrypt that data.

Global network of AWS Regions

AWS has the most extensive global cloud infrastructure. No other cloud provider offers as many Regions with multiple Availability Zones connected by low latency, high throughput, and highly redundant networking. The AWS Region/Availability Zone model has been recognized by Gartner as the recommended approach for running enterprise applications that require high availability.
