Client visit for Slickline Services Froozan Field:

Even though, the country is struggling with COVID 19 virus, the operation is still ongoing, WCP had a client visit (Petro Pars & IOOC) recently regarding Slickline services for Foroozan, the visit commenced successfully with considering all HSE protocols.

What's going on in WSI!

➤ WSI/PIA Quality Management System (QMS), Congratulations!

PIA has officially received "Contractor Ranking Certificate" as required by the clients, and also in the banking bid bond process. PIA is currently in the process of obtaining "Contractor Safety Certificate" as it is also required by the clients to participate in the pre-qualification phase of tenders with lower-level of risks. Majority of PIA staff have attended "Occupational Safety Training Course" and passed the corresponding exam offered by the Ministry of Labor. Upon completion of the training and exam by all PIA staff, PIA will be qualified to obtain the safety certificate which is anticipated to be in about few weeks depending on the Covid-19 pandemic situation. Furthermore, WSI is in the process of obtaining "Contractor Ranking Certificate" to apply for "Contractor Safety Certificate".

WSI ISO 9001:2015 implementation is nearly completed, as planned, addressing all the main ISO 9001 clauses to avoid receiving any Major Non-conformity during the official audit. Have a major non-conformity will result in not being qualified to obtain ISO 9001 certificate. However, we believe WSI is prepared to begin the journey of quality road! WSI has signed a contract with QS to be audited in October, 2021. Official audit will be conducted considering QS guidelines and WSI internal HSE measures to ensure that there are no negative impacts on the health of both WSI and PIA staff due to the pandemic situation.

New Technology!

➤ Top 10 Oil & Gas Industry Trends in 2021

With advancements in industry innovations, the oil & gas (O&G) industry trends are set to transform the industry in terms of efficiency, safety, and smart solutions.

The oil & gas industry is exploring ways to efficiently and competitively digitize, automate, and solve complex sub-surface engineering challenges. The use of artificial intelligence (AI) algorithms, in addition to providing a competitive edge, also enables oil & gas companies to increase field or well productivity. Further, the gradual adoption of advanced robotics and data management practices invigorates scientists to develop novel practices that accelerate the processing times and reduce human labor.
